MESSAGE FROM MANAGING DIRECTOR

Dear Parents,

It is correctly said that, **'Happy and secure children are ready to take on the next new stage of life.'** Having a child is a blessing for every parent; it is though a blessing with a very serious responsibility. There are no shortcuts in Parenting! There are no set rules! Parenting is a moreover trial and error, where to become a perfect parent some silent conditions needs to be understood and implemented.

Friends, being a well experienced person I will share with you all, these hidden conditions. It is well proved through various researches that **Just 15 minutes of play with your child will spark millions of brain connections.** So, spend time with your child. Give personal touch of care, concern and affection. Make your child feel emotionally secured. It is a basic duty of every Parent that proper healthy, hygienic, harmonious atmosphere is provided to the child.

Develop proper eating habits right from childhood. Balanced and nutritious diet is must so that certain health related issues are eliminated. As it is well said that **Healthy mind lives in healthy body.** Take a special care of your child and make sure that the complete responsibility of physical, mental and emotional well-being is on your shoulder.

Set up right examples and appreciate your child. Emotional well-being of every child is important. If being a parent you are taking care of it right from childhood, then they will acquire the cognitive and social skills through which they would become a matured adult and their future mental health is not compromised.

It takes a big heart to shape little minds. WE at ATMIYA are doing so and we want that every parent is also contributing their cent percent. Remember that **Children are great imitators. So give that something great to imitate.**

Happy Parenting
Warm Regards
Pravin Kachhadiya
Managing Director

PRINCIPAL'S DESK

"Arise! Awake! Stop Not Until The Goal is reached"

- Swami Vivekananda

Dear Parents and students

It is been truly said that, 'Journey of thousand miles begins with a single step'. In the month of April we have conducted one orientation session for std I and II parents and also one open house PTM. We got an opportunity to interact with some of you and we were glad to see a very positive approach of AGS Parents towards the development and educational growth of their wards. Before sharing the forth coming development prospectus, I, Avantika Wallia, the Principal of Atmya School would like to share with you all my educational profile.

I am a daughter of retired Army Officer and got an opportunity to seek my education from various CBSE schools, all over India. I am BA in Psychology, M.Sc. in Counseling Psychology, MBA in HR, B.Ed and even certified Career and Psychological counselor. I have a total 15 plus years of experience and out of which 10 years as Principal of CBSE schools

The academic year 2022-23 would be focusing on the holistic development of our students.

As we believe that our students are gem stones so, we have named our four houses on the names of precious Gem stones: Garnet (Red house), Citrine (Yellow house), Quartz (White house) and Sapphire (Blue house), duties and inter house competitions will be conducted accordingly.

Various Olympiad exams would be conducted in school.

We are under the process of seeking linkage with various national and international organizations for conducting National and International competitions and workshops for our students. By the month of July, we would be able to share with you all the list of tie-ups.

For the academic development of our students and to develop the pattern of conceptual base learning, we have recruited a well-qualified and competent team of teachers.

Class wise field trips and industrial visits for better correlations are under schedule.

Sets of teachers training programmes are scheduled for modifying the methodology of teaching and implanting child centric approach.

We believe that educating a child is a joint venture of the whole community, for that we would be laying the foundation of AGS Mothers' Club; where all mothers would be getting an opportunity not only to show case their talent but also to interact and participate in various competitions.

It is well said that in this era, we have to be techno-savvy, so we already started with our AV room, which is having digital board with a lot of informative content, soon four more class rooms would be installed with smart boards.

ERP system is the second add-on, it would be activated soon and all the information about academics and fees would be driven through it.

There is lot more in store and we would be constant in touch with you through our digital bulletin "YOUTHESTA". Youthesta means a community of learners working closely teaching, learning and innovation.

Happy learning
Avantika Wallia
Principal
AGS

MESSAGE FROM CAMPUS DIRECTOR

IMPORTANCE OF BOOKS

Dear students

"A room without books is like a body without a soul."

Books play a very important role in everyone's life, especially in a student's life. They are our best friends because they inspire us to do great things in life and overcome our failures. We learn a lot of things from them. Books are our best companions as they provide us knowledge unconditionally without asking anything in return.

Friendship with good books makes you a good person. In case when there is no one for your help, only these will become your companion in life. Books will always be there for you in your adverse times and bring positive value to our life.

For students, it is worth saying that:

A good book is like a good friend; the more you read it, the more interesting it will be.

Books have always benefited to the reader.

Books tell us about the History of mankind and civilizations.

Teaches Positive values, Spirituality and Love. With the help of good story books, one can learn moral values, ethics in life, and become a good human being.

Make us Intelligent: Reading good books like autobiographies of many prominent personalities, philosophers and authors inspire us to become or to achieve something great like them.

Increases Self Confidence, Boost Memory and Imagination Power: Reading books and novels can also improve our memory, reduce stress, and increase mental power as well as knowledge.

Books also help us to improve vocabulary, concentration power and make our thinking skills stronger.

Books are considered as a "store of information" using which we can gain information by reading at any time.

So, students enjoy reading good books.

Happy Reading

Regards

Rina Vasani
