“Sowing the Seeds of Success”

YOUTH FESTA-3

THE NEWS BULLETIN
ACADEMIC YEAR: 2024-25

« PRINCIPAL' ZONE »

Atmitya Green School in Bharuch has always been dedicated to providing an all-rounded education that empowers students to achieve their dreams. In alignment with this vision, we are excited to announce the launch of extra classes aimed at preparing students for prestigious competitive exams, such as the National Defence Academy (NDA). These classes will offer specialized training, guidance, and mentoring to help students excel and stand out in their chosen career paths.

Recognizing the need for focused career guidance, our institution is committed to helping students set and pursue their academic and professional goals. We foster an environment that encourages self-discipline, hard work, and resilience, all of which are essential qualities for success in competitive exams. Our dedicated faculty, with their vast experience and in-depth knowledge, are here to provide personalized attention and support to each student.

In addition to these initiatives, we are also expanding our academic horizons by soon introducing classes for 11th and 12th grades. This expansion will allow us to further equip students with the necessary knowledge and skills for higher studies, ensuring they are well-prepared for both competitive exams and their academic pursuits.

We are immensely proud to share that our respected Managing Director, Praveen Sir, was recently honored with the prestigious GSLC Inspire Education Award 2024 for "School with Inclusive Infrastructure (Regional)." This esteemed award recognizes the efforts of Atmitya Green School in creating an inclusive and supportive environment for all our students, ensuring that every individual feels valued and empowered.

Moreover, our students have made us proud by excelling in various sports and extracurricular activities, receiving recognition at both district and state levels. Their achievements reflect the holistic approach we take in fostering talent across all domains, be it academics, athletics, or the arts. At Atmitya Green School, we believe in nurturing champions in every field and supporting the growth of well-rounded individuals.

With our ever-growing focus on quality education, inclusive infrastructure, and career development, Atmitya Green School continues to be a place where future leaders and champions are nurtured, and dreams are transformed into reality.

Mr. Krishan Chandra Upadhyay

The Future of Education: Digital Learning in a Post-Pandemic World

"Education is the most powerful weapon which you can use to change the world."

– Nelson Mandela

In the ever-evolving landscape of education, the post-pandemic world has been a turning point. It has forced us to rethink how knowledge is imparted, how students engage with learning, and how technology can become an integral part of this transformation. The sudden shift to digital learning was not just a temporary response to a crisis; it was a gateway to a future brimming with opportunities for both educators and learners.

The Digital Classroom: A New Frontier

Classrooms are no longer confined to four walls. With the advent of technology, education has transcended physical boundaries. Students today have access to a wealth of knowledge at their fingertips, and digital platforms have become the new playgrounds of learning. Whether it is online courses, virtual labs, or interactive learning apps, the digital world offers an environment where curiosity can flourish, creativity can thrive, and knowledge can be expanded beyond textbooks.

But what makes this shift truly revolutionary is not just the tools themselves, but the accessibility they provide. Learning is no longer a privilege limited to a select few; it has become a right available to anyone with an internet connection. This democratization of education is shaping a future where every student has the opportunity to grow, regardless of their location or background.

Innovating for a Globalized World

In a world that is rapidly globalizing, the ability to innovate and adapt has become more important than ever. Digital learning equips students with the skills necessary to thrive in this dynamic world—critical thinking, problem-solving, and digital literacy. Collaborative tools like virtual classrooms and discussion forums encourage students from across the globe to engage in dialogue, exchange ideas, and work together on projects, preparing them for the interconnected world of tomorrow.

Moreover, artificial intelligence (AI) and personalized learning systems are creating pathways for more tailored educational experiences. Imagine a system where each student's learning journey is uniquely crafted to suit their pace, strengths, and interests. AI tutors, interactive simulations, and augmented reality tools are not dreams of the future—they are innovations already transforming classrooms today, making learning more engaging, effective, and personalized.

Challenges and the Way Forward

While the promise of digital learning is great, the transition is not without its challenges. The digital divide remains a significant barrier, with many students still lacking access to the technology required for online education. Additionally, the emotional and social aspects of learning, such as peer interaction and mentorship, can sometimes be lost in virtual classrooms.

However, these challenges present us with an opportunity to innovate further. Hybrid learning models, which blend the best of physical and digital classrooms, are being explored as the next step. Schools and institutions must also focus on bridging the digital divide by ensuring equitable access to resources, fostering digital skills among teachers, and developing robust infrastructure.

Empowering Tomorrow's Leaders

At its core, education is about empowering individuals to realize their potential and contribute meaningfully to society. As we move forward into this new age of learning, it is essential that we embrace these changes with open arms, while keeping the timeless values of education—curiosity, creativity, and compassion—at the forefront.

Digital learning is not just about adapting to change; it's about leading the change. In this future, students will no longer be passive recipients of information, but active participants in their own education. They will be the innovators, the problem-solvers, and the leaders of tomorrow's world.

As we navigate this transformative era, let us remember that the future of education is not just about technology—it's about creating a system that nurtures and inspires every learner to dream big, think critically, and shape a brighter, more inclusive future for all.

- Sarrah Kanchwala (Class Teacher of Sr.KG-B)

Nurturing Resilience: Stress Release, Failure Acceptance, and Healthy Growth for Children

Introduction:

However, these challenges present us with an opportunity to innovate further. Hybrid learning models, which blend the best of physical and digital classrooms, are being explored as the next step. Schools and institutions must also focus on bridging the digital divide by ensuring equitable access to resources, fostering digital skills among teachers, and developing robust infrastructure.

1. Encourage physical activity: Regular exercise, sports, or dance can help reduce stress and anxiety.
2. Mindfulness and meditation: Simple breathing exercises, yoga, or guided meditation can calm young minds.
3. Creative expression: Drawing, painting, or crafting can provide an emotional outlet.
4. Communication: Listen attentively to your child, validating their feelings and concerns.
5. Outdoor play: Nature walks, parks, or backyard games promote relaxation and exploration. .

Embracing Failure and Building Resilience:

1. Reframe failure as learning: View mistakes as opportunities for growth and improvement.
2. Encourage effort, not perfection: Praise persistence and progress, rather than outcome.
3. Foster a growth mindset: Believe abilities can be developed through dedication and hard work.
4. Model healthy attitudes: Share personal experiences of overcoming obstacles and learning from failures.
5. Celebrate small wins: Acknowledge and celebrate incremental achievements.

Healthy Growth and Development:

1. Balanced nutrition: Focus on whole foods, fruits, vegetables, whole grains, lean proteins, and healthy fats.
2. Limit junk food: Restrict or avoid sugary snacks, processed meats, and unhealthy beverages.
3. Regular sleep: Establish consistent bedtime routines for 8-10 hours of sleep.
4. Physical activity: Aim for 60 minutes of moderate-intensity exercise daily.
5. Screen time management: Set limits on TV, tablet, and smartphone usage.

Tips for Parents and Caregivers :

1. Lead by example: Demonstrate healthy habits and stress management techniques.
2. Create a supportive environment: Encourage open communication and emotional expression.
3. Set realistic expectations: Avoid pressure and focus on progress, not perfection.
4. Monitor and limit screen time: Ensure balanced media consumption.
5. Prioritize family time: Engage in activities promoting bonding and connection.

Conclusion:

By teaching children effective stress release techniques, fostering a growth mindset, and promoting healthy habits, we empower them to navigate life's challenges with resilience and confidence. As role models, we must prioritize our own well-being and model healthy behaviors. Together, we can cultivate a generation of happy, healthy, and thriving individuals.

Benefits of multilingual education

Do u know what is Multilingual Education?

Multilingual education (MLE) is the use of multiple languages in teaching and learning. It's based on the idea that no language is superior or inferior, and that children's home language can be used to help them learn new languages.

Multilingualism can be defined as "the ability of societies, institutions, groups and individuals to engage, on a regular basis, with more than one language in their day-to-day lives"

Learning a new language expands your mind and world view. It opens you up to new cultures and to the fruits of diversity. Speaking a second or third language will boost confidence and increase self-esteem. In a globalizing world, knowing a second or third language gives you an advantage career-wise.

The purpose of a multilingual education programme is to develop appropriate cognitive and reasoning skills enabling children to operate equally in their native, state and national languages, starting in mother tongue with transition to second (State language) and third languages (English).

A disadvantage is that students often fall behind academically while they are developing the language proficiency to learn academics in their second language.

Disadvantage of Multilingual Education are:

Delay in Speaking.

Mixing languages.

Additional effort for the parents.

Reading and writing.

In conclusion, multilingual education in Indian classrooms holds immense potential for nurturing linguistic diversity, promoting cultural preservation, and equipping students with valuable cognitive and communication skills.

-Parth Bhadane (Class X)

05
Aug

School Foundation Day

KG to 10

Students gathered and celebrated **School Foundation Day & Birthday of Atmiya Kachhadiya.**

AGS & AGNS Activities of August & September 2024

05 to
09
Aug

Assessment-1

Nursery to Sr.KG

Students from Nursery to Sr.KG appeared for their first Assessment of this academic year.

10
Aug

No Bag Day

1 to 10

This No Bag Day, various activities were conducted related to **Veer Gatha Project** where students performed solo Dance, skit, speech about political leaders, various Indian Inventions, and many more

10
Aug

Chatra Sanshad

6 to 10

To make our students learn the importance of **Chatra Sanshad**,
Special orientation programme was organised.

**13
Aug**

Special Activities

KG Section

Special activities were conducted related to Independence Day.

**14
Aug**

Har Ghar Tiranga Campaign

6 to 10

As we all are aware that to Mark significance of Independence Day our honorable **Prime Minister Shree Narendra Modi ji** has initiated **Har Ghar Tiranga** campaign.

Our school management has joined the hands with this campaign and wants to create awareness for the same.

Our students were taken to nearby areas of our school to distribute flags so that they can also participate in this campaign.

For this noble work **Bharuch collector Shree Tushar Sumera**, **Bharuch MLA Shree Ramesh Mistry**, **Bharuch DEO Shrimati Swatiben Roul**, **Bharuch Bhajapa President Shree Marutisinh Atodariya** and **Managing Director of Atmiya Green School Shree Pravinbhai Kachhadiya** joined us and encouraged our students for the same. We are grateful for their precious presence.

AGS & AGNS Activities of August & September 2024

**14
Aug**

Special Assembly

KG Section

Special assembly was organized celebrating Independence Day.

15
Aug

Independence Day Celebration

4 to 10

Students gathered and celebrated our **78th Independence Day** with precious presence of our **Managing Director Pravinbhai Kachhadiya**.

AGS & AGNS Activities of August & September 2024

15
Aug

Appreciation Award

Our Managing Director Pravinbhai Kachhadiya received appreciation award from Bharuch Nagar palika for his selfless public service whenever our country needs.

16
Aug

Rakshabandhan Celebration

KG Section

Mesmerising the pure bond of love, KG students celebrated Rakshabandhan.

**17
Aug**

Special Assembly

1 to 10

Special Assembly was organized for Rakshabandhan Celebration where students performed dance and girls tied rakhi to their classmate boys.

**17
Aug**

Library Week Celebration

1 to 10

As per CBSE circular, Library Week was celebrated conducting various class wise activities.

**22
Aug**

Handwriting Competition

1 & 2

Good handwriting has many benefits like cognitive abilities, Fine motor skills, Brain activity, Personal expression, Self-esteem and Communication.
